

Staff Spotlight – Lee Cain, Cyber Risk Services Advisor

In this edition of The Risk Advisor, we feature a Fund staff member. This allows the reader to get to know the functions provided by the colleague and how they can assist Fund members to access available information and services. Ultimately, we hope to improve member engagement.

FUND STAFF SPOTLIGHT: Lee Cain, Cyber Risk Services Advisor

How long have you been with The Fund?

I started working directly with the Fund in April of 2021. Prior, 2021, I was a System Administrator for Sedgwick, Inc. I was the Local Technology Contact for the Austin Office and had administration duties for the Houston office. I was also a System Administrator with York, Inc and JI Companies. All three of the companies I have worked for were the administration firms for the Fund. In reality, I have been associated with the Fund since 1999.

What is a Cyber Risk Services Advisor?

The Cyber Risk Services Advisor provides guidance on cyber risk efforts for the members. Risk assessments, plan testing, training, and policy guidance are all offered as value added services for Fund members. We try to stay on top of the requirements cyber insurance entities are utilizing for insurability, and we build those requirements into our risk assessments. This ensures that the members are prepared for what cyber insurance carriers are looking for when they underwrite business.

Tell me about your background.

I was born and raised in Austin. I graduated from Southwest Texas State University (Yes, I know, it is now Texas State University) with a major in Criminal Justice. After college, I worked for a planning commission assisting Police and Sheriff's departments with obtaining grant funding for special projects. It was in this role that I discovered I had an ability to help users with IT related issues. My position gradually took on extra duties in IT that included help desk support and data backups. I joined JI Companies in 1999. With training classes, mentorships, and on the job experience I progressed as a Network Administrator. Growing as a company, JI was eventually acquired by York and then Sedgwick. Working with a small company such as JI and then working for larger companies like Sedgwick gives me a unique perspective on IT and how technology should interface with the rest of the organization.

Tell me about your family.

My wife and I have been married for 34 years. We have a son and a daughter. We also have a grandson who was born on August 10th, 2024. An interesting fact: my wife has worked for the Office of the Attorney General longer than we have been married.

What do you do in your free time?

We love to travel, and we particularly enjoy the Pacific Northwest. I try to stay active so I can keep up with my kids and grandkids. I coached my kids in youth sports, and I look forward to hopefully helping my grandkids with their sports. I love to cook. Quick tasty meals are my specialty.

How do I contact you as Cyber Risk Services Advisor?

You can always email me at lee.cain@sedgwick.com. I field emails and calls daily helping to take care of our members. When I am not in the office, I will be either at a conference, a training session, or a district or authority office spending time with members on cyber education, assessments, and building lasting relationships.
